

PROFILES OF SUCCESS

Auglaize Municipal Building
Auglaize, Ohio
Archival Storage

Problem

When several municipalities in Auglaize, Ohio were converging into a newly constructed building, they realized they had a pressing storage concern on their hands. How would they combine multiple departments' individual storage needs, consisting of bulky ledger books and top-tab filing folders, into a joint filing room?

Solution

To create a shared filing room, the department heads chose a MobileTrak5® System with 4Post™ Shelving. The system was a versatile solution, with adjustable shelves that allowed Auglaize the flexibility to store the departments' various medias in one central location.

In order to store the municipalities' extensive number of ledger books, Datum incorporated EZ Roller Shelves onto standard 4Post™ Shelving. In addition to offering convenient access to the bulky books, EZ Rollers maintain the integrity of the books by eliminating damage caused by retrieving and returning the books from traditional stationary shelves.

They also wanted to keep their current top-tab file folders. Rather than change filing formats, Datum added rollout drawers that converted the 4Post™ Shelving, usually utilized with end-tab folders, into drawers to house the existing top-tab folders.

Datum utilizes design programs to create 3D color renderings for customers to see exactly what their unique storage system will look like in their facility, from size and scale to color and aesthetic appeal, before the system is purchased.
